

SCOPE OF SERVICES

Success Rehabilitation, Inc. is a post-acute rehabilitation facility specifically designed for adults who have sustained a traumatic brain injury or other neurological impairment. Neurologic impairment, such as a traumatic brain injury, affects virtually every area of an individual's life. Success Rehabilitation carefully integrates its program to provide comprehensive therapeutic and rehabilitative services for both the client and his/her family. Our mission is to help clients obtain a realistic, maximum level of independent functioning in the least restrictive community environment; one that advances individual productivity and well-being.

Main Facility

Success offers different options for community living in Quakertown, Pennsylvania. Success' main location is a 35-bed residential facility licensed as a Personal Care Home. It also houses our Structured Day Treatment Program as well as our clinical and administrative offices.

In our main residence, all clients have private rooms, and some rooms are equipped with private bathrooms. There are also 6 efficiency apartments (please see On-Site Residential Apartments for more information). The main residence is staffed 24 hours per day. Staff support clients in completing activities of daily living and instrumental activities of daily living for personal care and life skills, such as doing laundry, caring for their room and personal possessions. All residential clients participate in our Structured Day Treatment Program, and social and leisure activities are held in the residence and in the community in the evenings and weekends. Client Health and Wellness staff are available 16 hours per day, 7 days per week to provide assistance with medication administration, monitor health status and act as liaison with our clients' private physicians.

Success provides services along the continuum of care, allowing clients to transition through our programs as they progress in their rehabilitation. An individual program plan is developed for each client, incorporating all modalities, and based on client needs and goal. Services offered can be provided through employees, contractors, or providers in the community.

On-Site Residential Apartments

Success offers different options for community living in the town of Quakertown, Pennsylvania. The On-Site apartments are located at our main facility and offer each client their own small efficiency apartment. Some apartments are equipped with a kitchen, bath, living room and bedroom and some just include a kitchen, bath, and bedroom. The On-Site Apartments are staffed 24 hours per day. Staff provide assistance in areas such as meal planning and preparation, budgeting, money management, laundry skills, housekeeping, ADL's, employment assistance, etc. The staff and clients also plan weekend activities to further explore and take advantage of all community options. Since the On-Site Apartments are located at the main facility, nursing staff are available 16 hours per day, 7 days per week.

Off-Site Residential Homes

Success offers different options for community living in the towns of Quakertown & Lancaster, Pennsylvania. The residential homes are 3-8 bedroom homes with 24-hour staffing. Each client has a private bedroom with all the amenities needed to support an individual while residing in the community. Staff provide assistance in such areas as meal planning and preparation, budgeting, money management, laundry skills, housekeeping, ADL's, employment assistance, etc. The staff and clients at each home plan weekend activities to further explore and take advantage of all community options.

Off-Site Residential Apartments

Success offers different options for community living in the towns of Dublin and Bethlehem, Pennsylvania, which is approximately 15-30 minutes from our main facility. The off-site residential apartments are located in the heart of Dublin and Bethlehem in beautiful garden apartments. Each apartment is either 1 or 2 bedrooms in which the client has their own private apartment or bedroom. The apartments are staffed 24 hours per day. Staff provide assistance in areas such as meal planning and preparation, budgeting, money management, laundry skills, housekeeping, ADL's, employment assistance, etc. The staff and clients at each

home plan weekend activities to further explore and take advantage of all community options.

Outpatient Rehabilitation Program/Neurocognitive Programming

Success services are offered both residentially and on an outpatient basis at the Success Rehabilitation and Acadia NeuroRehab, A Division of Success Rehabilitation, locations. Services focus on providing neurocognitive rehabilitation to improve individual interaction in major life activities including, but not limited to, speaking, learning, working, sleeping, concentrating, reading, processing of information, and communication.

The program runs from 9:00 a.m. to 5:00 p.m. Monday through Friday and there are scheduled activities on evenings and weekends. The program is designed to improve independent functioning in these areas through specific neurocognitive group activities as well as direct instruction, specially designed instruction, goal setting, supervised practice, peer interaction/support, appropriate social skills, technology, compensatory strategy training, self-awareness instruction and self-advocacy training.

Utilizing a therapeutic approach, consumers will identify outcome measures based on issues with major life activities, and an Individual Program Description (IPD) is developed to address these target areas. The plan will document specific neurocognitive strategies or equipment, which will be used to assist the individual to achieve greater independence in these areas.

Each Neurocognitive group is facilitated by a degreed staff member that is a Certified Brain Injury Specialist with many years of experience working with adults with traumatic brain injury. Lesson plans are generated weekly to outline and implement various daily cognitive group activities.

Community Skills Program

Community Skills Program – a Division of Success Rehabilitation, Inc. is a non-residential, post-acute program designed to assist individuals with brain injury to make the transition from hospital-based/facility-based programs to living as independently as possible in their own home and community. Staff work one-to-one with their clients in the clients’ homes and communities to enable them to maximize self-directed, responsible behavior, live as independently as possible, and achieve a better quality of life. Services are focused on addressing cognition as related to functional abilities in areas such as self-care, household management, community mobility, educational activities, vocational activities, parenting, and/or community involvement. As individuals make progress and establish their own support system in the community, their involvement with Community Skills Program is gradually and systematically reduced to foster increased independence and maximize the individual’s potential for successful community living.
